

CORPORATE PROFILE

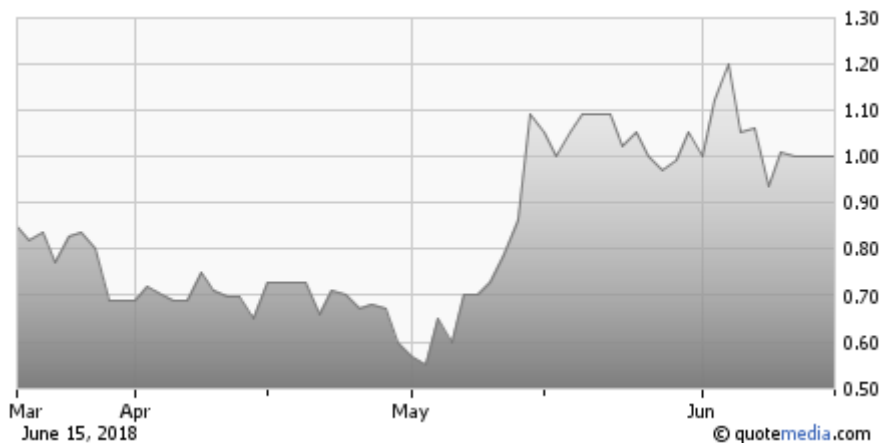

CURE Pharmaceutical is a fully integrated life science company with a proprietary platform of dosage forms and delivery systems for a broad range of molecules. As a preeminent developer and manufacturer of the most advanced oral thin film (OTF) on the market today with an industry leading full service cGMP manufacturer, CURE is on a mission to make medications easier to take, more efficacious, and with fewer tolerability and side effects. CURE offers the most advanced development and manufacturing of nutraceuticals, OTC products, pharmaceuticals, and veterinary medicants in a patented, proprietary, OTF delivery system. Alongside its stand-alone OTF technology, CURE has developed an array of products in cutting-edge delivery platforms such as, sublingual and transdermal applications. Collectively CURE brings over 90 years of experience formulating and manufacturing nutraceuticals, OTC products, pharmaceuticals, and veterinary medications placing quality and service as our top priorities, thus earning us the trust and respect of customers worldwide.
