

CORPORATE PROFILE

PeerLogix is an advertising technology and data aggregation company providing a proprietary software as a service, or SAAS, platform which enables the tracking and cataloging of over-the-top viewership and listenership in order to determine consumer trends and preferences based upon media consumption.

PeerLogix's patent pending platform collects over-the-top data, including IP addresses of the streaming and downloading parties (e.g., location), the name, media type (whether movie, television, documentary, music, e-books, software, etc.), and genre of media watched, listened or downloaded, and utilizes licensed and publicly available demographic and other databases to further filter the collected data to provide insights into consumer preferences to digital advertising firms, product and media companies, entertainment studios and others.
